

### HOW TO MEASURE YOUR RING SIZE:

Wrap a strip of paper around your finger. Mark the spot where the paper meets the other end. Measure the strip of paper up to the spot you marked when it was wrapped around your finger with a ruler or tape measure. Use the chart below to get your ring size. Example: a size 10 equals  $2 \frac{7}{16}$  in. or 61.9mm. After calculating please use US measurements.
